

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of the Claims:

1. (currently amended) A portable phone comprising:
a housing having a top portion and a bottom portion;
a keypad positioned on the bottom portion of the housing;
a display screen positioned in a first position generally above the keypad on the top portion of the housing;

and a navigational key positioned on the housing between the display screen and the keypad;
wherein the display screen is rotatable from the first position to a second position where the display screen is positioned generally to the side of the keypad and navigational key; and the keypad is axially extendable from the navigational key from a first position to a second position.
2. (currently amended) The phone of claim 1, wherein the display screen rotates [approximately] at least 90 degrees from the first position to the second position.
3. (canceled)
4. (original) The phone of claim 1, wherein the display screen in the second position is positioned generally to the right of the keypad and the navigational key.
5. (currently amended) The phone of claim [3]1, wherein the keypad is extendable from the navigational key to provide a geometry having improved gaming characteristics.
6. (currently amended) The phone of claim [3]1, wherein the housing includes a slideway adapted for cooperation with a slide positioned on a bottom surface of the keypad to

facilitate the extension of the keypad.

7. (currently amended) The phone of claim 1, wherein the display screen pivots [about] in relation to the housing so that when the display screen is in the second position, the display screen is generally centered between the navigational key and the keypad.

8. (original) The phone of claim 1, further including means for extending the keypad from the navigational key when the display screen is in the second position.

9. (currently amended) A portable phone comprising:
a housing having a top portion and a bottom portion;
a keypad positioned on the bottom portion of the housing;
a display screen positioned in a first position generally above the keypad on the top portion of the housing;

and a navigational key positioned on the housing between the display screen and the keypad; wherein the display screen and navigational key are both rotatable [about] 180 degrees around a pivot from a first position wherein the navigational key is located between the display screen and the keypad to a second position wherein the display screen is located between the navigational key and the keypad.

10. (canceled)

11. (currently amended) The phone of claim 9, wherein the keypad is axially extendable from the display screen when the display screen is in the second position.

12. (currently amended) The phone of claim 11, wherein the navigational key is also axially extendable [from the] from the display screen when the display screen is in the second

position.

13. (currently amended) The phone of claim 9, wherein the navigational key is axially extendable [from the] from the display screen when the display screen is in the second position.

14. (currently amended) The phone of claim 9, wherein the keypad and navigational key are both axially extendable from the display screen to provide a geometry having improved gaming characteristics.

15. (original) The phone of claim 11, wherein the housing includes a slideway adapted for cooperation with a slide positioned on a bottom surface of the keypad to facilitate the extension of the keypad.

16. (currently amended) The phone of claim 9, wherein the display screen and navigational key pivot [about] around a pivot point on the housing so that when the display screen and navigational key are in the second position, the display screen is generally centered between the navigational key and the keypad.

17. (currently amended) The phone of claim 9, further including means for axially extending the keypad from the housing when the display screen and navigational key are in the second position.

18. (currently amended) The phone of claim 17, further including means for axially extending the navigational key from the display screen when the display screen and navigational key are in the second position.

19. (currently amended) The phone of claim 9, further including means for axially extending the navigational key from the display screen when the display screen and navigational key

are in the second position.

20. (currently amended) A portable phone comprising:
a housing having a top portion and a bottom portion;
a navigational key positioned on the bottom portion of the housing;
a display screen positioned in a first position generally above the navigational key on the top portion of the housing;
and a keypad positioned on the housing between the display screen and the navigational key;
wherein the display screen is rotatable from the first position to a second position where the display screen is positioned generally to the side of the keypad and navigational key, and wherein the navigational key is axially extendable from the keypad when the display screen is in the second position.

21. (currently amended) The phone of claim 20, wherein the display screen rotates [approximately] at least 90 degrees from the first position to the second position.

22. (canceled)

23. (original) The phone of claim 20, wherein the display screen in the second position is positioned generally to the right of the keypad and the navigational key.

24. (currently amended) The phone of claim 2[2]0, wherein the keypad is axially extendable from the navigational key to provide a geometry having improved gaming characteristics.

25. (currently amended) The phone of claim 2[2]0, wherein the housing includes a slideway adapted for cooperation with a slide positioned on a bottom surface of the navigational key to facilitate the extension of the navigational key.

26. (currently amended) The phone of claim 20, wherein the display screen pivots [about] 180 degrees around the housing so that when the display screen is in the second position, the display screen is generally centered between the navigational key and the keypad.

27. (currently amended) A portable phone comprising:
a housing having a top portion and a bottom portion;
a navigational key positioned on the bottom portion of the housing;
a display screen positioned in a first position generally above the navigational key on the top portion of the housing;

and a keypad positioned on the housing between the display screen and the navigational key; wherein the display screen and keypad are both rotatable [about] 180 degrees around a pivot from a first position wherein the keypad is located between the display screen and the navigational key to a second position wherein the display screen is located between the navigational key and the keypad.

28. (canceled)

29. (currently amended) The phone of claim 27, wherein the navigational key is axially extendable from the display screen when the display screen is in the second position.

30. (currently amended) The phone of claim 29, wherein the keypad is also axially extendable [from the] from the display screen when the display screen is in the second position.

31. (currently amended) The phone of claim 27, wherein the keypad is axially extendable [from the] from the display screen when the display screen is in the second position.

32. (currently amended) The phone of claim 27, wherein the keypad and navigational key are both axially extendable from the display screen to provide a geometry having improved gaming characteristics.

33. (original) The phone of claim 29, wherein the housing includes a slideway adapted for cooperation with a slide positioned on a bottom surface of the navigational key to facilitate the extension of the navigational key.

34. (currently amended) The phone of claim 27, wherein the display screen and keypad pivot [about] around a pivot point on the housing so that when the display screen and keypad are in the second position, the display screen is generally centered between the navigational key and the keypad.

35. (currently amended) The phone of claim 27, further including means for axially extending the navigational key from the housing when the display screen and keypad are in the second position.
